Vision Doeve Brokers

Modern Hybride motor yacht with an electric propulsion system that, due to her batteries and the generator, still has a large range. Built according to the modern vacuum injection construction method making her a very lightweight boat with good sailing characteristics and with the desired speed without a lot of fuel consumption. The interior is equipped with a V-berth in the bow, bathroom with washbasin and toilet, galley with ceramic cooking, salon with inside steering position, comfortable couch, 2 doors to the cockpit where the outside steering position is situated and with a door in the mirror which makes the swimming platform easily accessible. With the exception of a small stairs, this motor yacht is equal leveled and therefore very suitable for slightly less mobile users. With her low air draft of only approx. 2.45 m, a large sailing area can be reached.
