Vision Doeve Brokers

This robust and sturdy ship was built as a Parlevinker (floating shop). Due to circumstances she was never used for this purpose and the current owner had her converted in 2008/2009 into the cruising liveaboard she is today. This major renovation focused on living, comfort and autonomy. The underwater hull and freeboard were sandblasted in 2022. The very spacious salon is equipped with underfloor heating, plastic window frames, double glazing, screens and offers a panoramic view of the surroundings. The generous aft deck is a wonderful outdoor living area. The electrical system was an important focus during the renovation. In addition to the combi inverter/charger, there are 12 service batteries powered by 12 solar panels. A professional generator is also included. The ship is completely self-supporting and equipped with two spud poles. This solid motor yacht offers you space, comfort and autonomy to travel, to enjoy and, if desired, to live on board.
