Vision Doeve Brokers

This motor yacht has been thoroughly renovated by the current owner with the aim of undertaking long coastal voyages and cruises on the Baltic Sea, including Norway. Due to circumstances, this trawler yacht has primarily sailed in and along the coastal waters of France, Germany, the Netherlands and Belgium. The vessel is equipped with two new engines, and the entire technical installation has been replaced, including an extensive navigation system that ensures reliability and ease of use. Additionally, stabilizers have been installed for added comfort during long sea voyages. The interior has been completely adapted for these journey objectives, making the motor yacht suitable for both long-distance sea voyages and on the inland waterways. It is also a ship that is very suitable for living on board. The hull and freeboard have recently been blasted and coated with a new 2-component paint system, ensuring that the yacht is not only in top condition technically but also has an impressive visual appearance. If you are looking for a turnkey trawler yacht with excellent sailing characteristics both at sea and on inland waters, this is your chance to make your dreams come true.
