Vision Doeve Brokers

This patrol vessel is available for immediate delivery and features a spacious cockpit with an aft swim platform, making it highly suitable for easily removing objects out of the water or for use in diving operations. Thanks to the presence of both a bow thruster and a stern thruster, the vessel is also exceptionally good to maneuver. The wheelhouse is easily accessible and fitted with a comfortable settee and two loose chairs. Beside the steering position is the chart table with fixed seating. In the front, the vessel is equipped with the galley, a round settee, and the toilet and shower compartment. In the recent past, the vessel has been trapped beneath a bridge, resulting in damage to the superstructure. As a consequence, water ingress marks are visible in the ceiling of the wheelhouse. It is also possible that (a part of) the installed navigational equipment is no longer functioning properly. The current asking price is based on this condition. In our opinion, this is a heavily and solidly built vessel that, after restoration to her original condition and with renewal of the ES-TRIN certificate, will once again be a highly versatile craft.
