Vision Doeve Brokers

This Luxe Motor was newly built for and partly by the present owner to provide living comfortably onboard while cruising the European inland waterways with a limited number of guests. No expense was spared to achieve a high level of comfort and practicality. The vessel features an extensive technical installation, including a vehicle crane. The forepeak serves as a garage for a small car (or motorcycle). Another distinctive feature is the hydraulically height-adjustable wheelhouse roof. Lowering the roof reduces the air draft to only approx. 2.60 meters. The accommodation is spacious and practically arranged, with two comfortable guest cabins, each with an en suite bathroom. In addition, there is an owner's cabin with en suite bathroom, a salon and a spacious galley. The wheelhouse offers an excellent steering position and ample seating with panoramic views. Side doors and aft doors provide excellent access to the outside and make manoeuvring easy. During recent years the exterior has received less attention, resulting in some deferred maintenance. This has been fully reflected in the asking price. An excellent opportunity for anyone seeking a spacious and comfortable liveaboard barge with an extensive cruising range.
